PERSONAL DETAILS

Father's Name
Ramesh P

Mother's Name
Deebarani M

LANGUAGES

Tamil

English

PROGRAMMING

Python

R

C

KEY EXPOSURE

Data Preprocessing

Model Selection

Feature Engineering

Algorithm Analysis

Evaluation Metrics

Cross-Validation

Deep Learning

Deployment

OVERVIEW

Student in St. Joseph's College of Engineering in the Information Technology Department. Have a well good knowledge in Python, Machine Learning models and Data Analysis techniques.

EDUCATION

St. Joseph's College of Engineering

2020 - 2024

Bachelor of Technology - Information Technology

CGPA: 8.67 / 10.0

Mary Matha Matriculation Higher Secondary School

2018 - 2020

HSC (Computer Science Department)

Percentage: 80.6%

Mary Matha Matriculation Higher Secondary School

2017 - 2018

SSLC

Percentage: 96.0%

WORK EXPERIENCE

KANINI Incubation Process

2022 - 2023

In-Office & Online Internship

Worked on building Machine Learning Models and Data Analysis. Gained hands-on experience using TensorFlow, OpenCV, Pytesseract modules, and PyTorch framework.

Bolt IoT

2021 - 2022

Online Intern

Worked with hardware components, sensors, Wi-Fi modules, processors, and transistors. Gained experience in analyzing processor circuits, GPU architectures, and hardware modules.

STRENGTHS

Resilience in Challenges

Improved Relationships

Enhanced Problem-Solving

High Motivation

Nithees Kanna

INFORMATION TECHNOLOGY STUDENT

nithees2424@gmail.com

SKILLS

Python DS/OOPS	
ML on OpenCV	
Problem Solving	
Cybersecurity	
TF/CV/PyTorch	
Malware AI Det.	

REFERENCES

Dr. Latha Selvi G

Associate Professor & Head of IT
St. Joseph's College of Engineering
OMR, Chennai - 600119

Dr. Sumathi S

Assistant Professor of IT
St. Joseph's College of Engineering
OMR, Chennai - 600119

GROWTH AREAS

- Managing Success Expectation
- Processing Feedback
- Calibrating Scope

PROJECTS

Weak File Analysis system using ML and AI

Scans system files for weak security protections, informing the user via dense neural network models (TensorFlow).

Waste Water Treatment Analysis

Identifies portable water among waste water using sensors coupled with a custom CNN model simulation.

License Plate Detection System

Detects vehicle license plates from camera imagery using CNN and deep regression techniques.

Customer Segmentation via Spotify Database

Segments client bases using user music tastes mapped against Spotify genre datasets.

Face Mask Detection & Notification

Real-time face mask compliance checking system using Pytesseract, OpenCV, and CNN.

Hand Gesture Media Control

Allows gesture-based media control using computer vision and TensorFlow models.

Processing System for Server Malware AI Protection

Provides dynamic security patches using ML/AI models for real-time virus detection.

COURSES & CERTIFICATIONS

Programming for Everybody (Python) ID: KC4G2FRDLZ2R	Coursera 2021
Python Data Structures ID: XJCKUYEPKRUS	Coursera 2021
AI Appreciate and Aware Award Completed AI Azure program conducted by Digital India and Intel.	CBSE & Intel 2021
Data Analysis with Python ID: e237e58f9e1d4d3ab8daf00fb4fe1991	Cognitive AI 2022
Machine Learning with Python ID: 5251e148cf6b4a59941e51800e1c2efb	Cognitive AI 2023
